314796	<b>Multi-Stage Fitness Beep Test (CD)</b>	Available <b>\$43.20</b>
--------	---	--------------------------

The 20m Shuttle Run Test is one of the best methods for testing aerobic fitness and is suitable for athletes in active training, coaches with large groups to teach and people exercising to improve general well-being. It contains scores which have been obtained by a wide range of groups of children and adults. All you require is a CD player and two markers placed 20 metres apart. On the CD it is possible to repeat individual tracks quickly and with great precision. It also contains additional tracks for performing constant paced interval training and a sub-maximal aerobic test.

314792	<b>Yo Yo Beep Test</b>	Available <b>\$69.00</b>
--------	------------------------	--------------------------

The Yo-Yo tests provide an important tool in determining an individual's fitness level. The physical capacity is evaluated in a fast and simple manner. Two markers are positioned at a distance of 20 metres. The enclosed CD-ROM is placed in a CD player and the test can be performed. The participant runs like a Yo-Yo back and forth between the markers at given speeds that are controlled by the CD-ROM. The speed is regularly increased, and when the individual can no longer maintain the required speed, the test is ended and the result determined from the distance covered during the test. Since each of the three tests has two levels they can be used by anyone, irrespective of training status. Level 1 should be for untrained and less trained individuals, and Level 2 for well trained athletes. There are three Yo Yo tests.

314790	<b>Sit Up Cadence CD</b>	Available <b>\$16.20</b>
--------	--------------------------	--------------------------

Used as a measure for fitness testing through sit up exercises. Comes with instructions.
